

## *Time for Spring!*

*Photos and info courtesy Jim Wagner*

**Forsythia in bloom in mid-April**  
Time to start partially removing some of the mulch around rose bushes. In years when we have severe sub-freezing temperatures this bush may not bloom.

**Fragrant Cloud**  
before pruning and after, with new growth emerging

**Cane Borer Damage**  
Take time to apply some Elmer's White Glue to pruning cuts in canes larger than a pencil to block cane borer wasps from drilling into the cane.
